

DECEMBER 2008 BLM OIL AND GAS LEASE PARCEL SALE  
INFORMATION SHEET

**Amasa Back Area**  
**Parcels: UT1108-200**

**Description:** Parcel is adjacent and overlapping the Amasa Back bike trail and the Jackson Hole bike trail southwest of Moab.

**Resource Concerns:**

**River and water resources:** Riparian, wildlife, recreational, and wild & scenic values of the Colorado River corridor. In addition, the parcel lies within a 100-year floodplain, which contains critical habitat of endangered fishes, critical riparian habitat, critical watershed, and potential flash flood areas.

**Species Habitat:** Critical habitat and nesting sites for raptor species burrowing owl and ferruginous hawk.

**Visual Resources:** VRM Class II designation for high-quality visual resources along the scenic 279 (Potash Road) corridor.

**Other considerations:**

The BLM has attempted in its RMP (Resource Management Plan) to mitigate the above concerns by placing stipulations intended for protection of habitat, viewshed, and prohibition or limitation of surface occupancy. However, these stipulations are not a replacement for a more protective “no lease” option. Each stipulation provides an “exception,” allowing lessee a potential loophole around the intended protections. Only a handful of the 21 pages of stipulations expressly prohibit oil & gas from these exceptions. In addition, the BLM’s provided stipulations fail to address cumulative effects of oil & gas leasing and the bigger picture of regional environmental protection.

Also keep in mind that if a parcel contains NSO (No Surface Occupancy) stipulations, the parcel must be drilled at from an *adjacent* parcel. The RMP does not adequately address the implications of this need, or the logistics of facilitating this type of drilling while upholding needed environmental protections.

For more information on stipulations or explanations of the new Visual Resource Management stipulations, please refer to a downloadable copy of the BLM’s RMP (Resource Management Plan) found online at:
